(3) Where the format or arrangement of the record is such that the information is not clearly or accurately reflected, the regional director (compliance) may require a format or arrangement which will clearly and accurately reflect the information.

(4) Entries required by this subpart to be made into records will be made on the day on which the operation or transaction occurs. ## § 19.983 Spirits rendered unfit for beverage use in the production process.

Where spirits are rendered unfit for beverage use before removal from the production system, the proprietor shall enter into the production records, in addition to the quantity and proof of spirits produced, the kind and quantity of materials added to each lot of spirits. In such a case, a separate record under § 19.985 is not required. The quantity of spirits produced will be determined by subtracting the quantity of materials added to render the spirits unfit for beverage use from the quantity of fuel alcohol produced and multiplying the resulting figure by the proof of each lot of spirits. The proprietor shall determine the proof of each lot of spirits. The proprietor shall procure a representative sample of each lot, prior to the addition of any material for rendering the spirits unfit for beverage use, and proof the sample in accordance with the provisions of § 19.980(a). This paragraph applies to in-line addition of materials and to systems in which, before any spirits come off the production equipment, the proprietor adds materials for rendering the spirits unfit for beverage use to the first receptacle where spirits are to be deposited.
